# HAIR CARE – BRUSHES – ROUND VENT BRUSHES (BRV-P)

Special brushes with aluminium barrel for blowing up boost hair volume and texture, enable airflowing and reduce the time of hair drying.

code: 52500 – ROUND VENT BRUSH

Round vent brush with polyamid bristles, aluminium barrel and light-weight plastic handle for hairstyling. Holes in the barrel are an effective way of allowing the heat from the blow-dryer to circulate at the roots of the hair and create more volume, and these can help mold the hair, protect it from damage caused by heat, as well as reduce static.

Brush has antistatic effects and is heat and chemical resistant.

Available in four sizes.

Average of barrel: 15 mm.

Length 21,8 cm.

code: 52510 – ROUND VENT BRUSH

Round vent brush with polyamid bristles, aluminium barrel and light-weight plastic handle for hairstyling. Holes in the barrel are an effective way of allowing the heat from the blow-dryer to circulate at the roots of the hair and create more volume, and these can help mold the hair, protect it from damage caused by heat, as well as reduce static.

Brush has antistatic effects and is heat and chemical resistant.

Available in four sizes.

Average of barrel: 22 mm.

Length 23,7 cm.

code: 52520 – ROUND VENT BRUSH

Round vent brush with polyamid bristles, aluminium barrel and light-weight plastic handle for hairstyling. Holes in the barrel are an effective way of allowing the heat from the blow-dryer to circulate at the roots of the hair and create more volume, and these can help mold the hair, protect it from damage caused by heat, as well as reduce static.
